The Differentiated Classroom: Hope for All Students, Grades

K-12: No two students are exactly alike, but in classrooms across America students are treated as though they are identical. The purpose of this training is to provide clear strategies, support and guidance in dealing with learning environment, curriculum, assessment and instruction for the intellectual capabilities of each student.

Introduction to Singapore Math Strategies: Explore the components of Singapore Math and how you can put this amazing math approach to work in your classroom-without changing your curriculum!
